

2019考研英语二大作文押题预测

第一部分：作文预测

大作文图片类型：1. 柱形图； 2. 曲线图、饼形图、统计表格

预测话题包括：1. 网络类（科技发展，互联网上网人数，选择电子设备考虑因素）； 2.

文化生活类（出国留学人数变化、大学生就业、城镇参加养老保险人数、影院与观影人

数变化，读书，学历） 3. 环境类（交通状况，空气污染，可再生能源）

第二部分：部分预测作文范文（划线部分为建议背诵句型，括号内容为可以替换内容）

大作文预测话题一：网络类（消费新变化、支付手段新变化等新现象）

As is clearly mirrored in the above pie chart, the proportion of ways for shoppers to obtain the product information demonstrates evident distinctions in 2014. According to the data given, the Internet advertisement takes a lion's share, accounting for 40% , while TV commercials and flyers take away respectively 22% and 18% of the whole proportion.

What triggers this phenomenon? It is not difficult to put forward several factors responsible for this. Initially, with the accelerated advancement of the Internet technology, the increase of netizens is apparently noticed by us. Thus, numerous individuals tend to buy products online instead of going for the real

shop in the streets or shopping malls. To continue, TVs are still widely in use for most families, which supports a strong purchase power by TV commercials. Terminally, quite a few folks are giving out flyers to the passers-by, and most of them would like to accept it, and this is the very reason why flyers rank the third in the pie chart.

In view of the arguments above, we can conclude that the current phenomenon is of no surprise. And therefore, it can be predicted that the network way will undoubtedly advance in the years ahead.

中国网购市场交易额，2011-2015

What is explicitly demonstrated in the above chart is the sales changes of online shopping in domestic market over the period from 2011 to 2015. The turnover of e-commerce saw a substantial gain from approximately 800 billion in 2011 to 2500 billion in 2014. Surprisingly, it is predicted that the figure will continue to soar dramatically to roughly 3400 billion in 2015.

We can easily recognize its advantages as follows: e-commerce, which is extremely convenient, can save us a great amount of precious time and we can buy products everywhere you want as long as we can surf online. However, for all the advantages mentioned above, online trading is by no means without its limitations as listed below: we may be cheated by some online retailers, which might be a potential threat to our bank accounts.

Accordingly, it is imperative for us to take drastic measures. For one thing, we should appeal to the authorities to make strict legislations to severely punish those who deliberately spoil the interests of online customers. For another, we should enhance the awareness of residents that rational purchasing is conducive to our income management. Only in this way can we maximize the merits and minimize the demerits of online purchasing.

大作文预测话题二：文化生活类（出国留学人数变化、大学生就业、人口老龄化、影院与观影人数变化）

As is explicitly demonstrated in the line graph above, the 6 years between 2007 and 2012 have witnessed some remarkable changes with regard to the statistics of Chinese students studying abroad. To be concrete, the number of Chinese students to pursue a further study in other countries has experienced a steady gain of 50 thousand, from roughly 10 thousand in 2007 to approximately 60 thousand in 2012.

Theoretically speaking, several fundamental driving forces could account for this phenomenon in the graph, with the following three weighing the most from my

perspective. Previously, with the accelerating pace of the economy and society, parents in mounting numbers have possessed sufficient financial resources, which enables them to afford their children's higher education in developed countries. Simultaneously, we have not failed to notice that, owing to even more desirable education facilities and atmosphere in advanced countries like the United States and British than that in our country, thus it is without wonder that an ocean of students study overseas to equip them with a preferable education. Ultimately, so fierce is the competition of the job market that an increasing number of students have inclined to be an overseas returnee to have competitive advantages over others.

Taking what has been has been argued so far into account, we may inevitable conclude that the fashionable trend will continue in the forthcoming future. Yet, we should take it rationally. Although it is profitable for broadening people's horizons, it may also lead an extravagant and meaningless life for some people. Accordingly, people should treat it rationally. And it is also advisable for the government to pay closer attention to the quality of domestic university education.

The pie chart above reveals clearly the percentage of graduates' inclinations for work option. Based on the data given above, the proportion of salary and welfare ranks the highest, at approximately 52%, over a half of the total. By contrast, with respect to enterprise scale, promotion opportunity and interpersonal relationship cultivation, the amounts account for only

22%, 18% and 8% respectively.

The fundamental factors that contribute to this trend may be summarized as follows. First and foremost, due to the strengthening economic growth, price of commodities are witnessing considerable climb increasingly, especially in the metropolitan cities. As a result, graduates need handsome income to sustain their life or even decent one. What's more, the generous welfare can further secure the quality of life and enable the graduates to fully enjoy their new starting point. Consequently, nearly half of the graduates are inclined to view salary and welfare as the prior option in their pursuit of work.

In view of the arguments discussed above, I firmly believe that such established trend will definitely continue for quite a while in the forthcoming years. Accordingly, it is advisable for those enterprises that aspire to recruit qualified applicants to take this into consideration.

2016 年中美电影票房统计

类别	中国电影	美国电影
国内票房（亿人民币）	243	132
本国全年票房占比	81.0%	33.0%
海外票房（亿人民币）	57	268
本国全年票房占比	19.0%	67.0%

From the table given above, we can observe that the box-office revenue of Chinese films and Americans films demonstrates evident distinctions in 2016. According to the data given, the domestic box-office revenue of Chinese films has a large share in China, accounting for 81% of the whole revenue in China. While the domestic box-office revenue of American films in the local market takes away 33.0% of the whole American film proportion.

Such difference may be rooted in the following reasons. First, Chinese film's main target audiences are those who have solid knowledge of Chinese culture and history. Hardly can the audience understand the plots without Chinese cultural background. Second, American film company has a great advantage at distribution and marketing, they know what their audiences really like after doing a series of serious studies.

Taking into account what has been argued, it is no surprise to see this situation. If the Chinese film maker makes little or no independent reflections on the film's production, distribution and marketing, the market share of Chinese film will go from bad to worse.

大作文预测话题三：环境类（交通状况、动物/资源保护等）

Accidents in a Chinese City (2005)

Main accident causes	Number of accidents in 2005	Percentage rise (+) or fall (-)
Drivers turning left without due care	608	+10%
Drivers turning too close to other vehicles	411	+9%
pedestrians crossing roads carelessly	401	+12%
Drivers driving under the influence of alcohol	281	+15%
Drivers failing to give a signal	264	-5%

Here is a table, telling us an interesting phenomenon. There is no doubt that the table displays accidents in one Chinese city. As is clearly depicted, drivers turning left without due care cause the most accidents in this city and the percentage of drivers driving under the influence of alcohol enjoys the biggest rise in 2005. Obviously, the difference manifested by the table should be given more concern.

What might trigger this affair? For one part, the general public have failed to realize the importance of abiding by the traffic regulations and laws (and a big deal of the attention have been distracted by the so-called “great affair”.) Once some drivers easily disregard the traffic signals, so do other drivers who intend to obey the laws. Moreover, the current state of affairs depicted in the drawing, may have been encouraged, though not justified, by the lack of severe legal penalty.

It is advisable for us to take steps to reverse this current evil trend. On one hand, we should cultivate the awareness of people .On the other hand, it is high time that more severe and sound laws and regulations should be introduced to harness and curb this matter. Only in this way, can we crack the hard nut and embrace a bright future.
